Art Unit: 1645

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-46, drawn to blood processing systems, classified in class 435, subclass 283.1.
 - II. Claims 47-80, drawn to blood processing methods, classified in class 435, subclass 2.
2. The inventions are distinct, each from the other because of the following reasons:

Invention I, drawn to blood processing systems and Invention II, drawn to blood processing methods are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method claims recite conveying blood drawn from an individual to an extracorporeal apparatus, operating the extracorporeal apparatus to conduct separation of the blood into plasma and at least one cellular blood component, and removing cytokines or other species of proinflammatory or anti-inflammatory stimulators or mediators from either plasma, or the at least one cellular blood component. However, given that the amino acid sequence structure of numerous cytokines and pro-inflammatory and anti-inflammatory stimulators or mediators are already known in the

Art Unit: 1645

scientific community, it would seem apparent that other systems have been successful in removing these cytokines from blood.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their separate classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Navarro whose telephone number is (703) 306-3225.
